Saliva collection instructions

- ✓ Saliva collection must happen **30 à 40 minutes after wake up** for Morning Cortisol, **at the 4 indicated hours for Nycthemeral Cycle of Cortisol.**
- ✓ Collection must be done before drinking, eating or teeth brushing.
- ✓ Rinse your mouth with clear water, swallow one of two times and drain the rest of water in your mouth. Then put saliva in the tube without using the coton. We need **at least 2 ml of saliva.**
- ✓ If there is at least a little blood stain on the sample, don't use it and take a new one with another Salivette.
- ✓ Fill the form with **date and hour of collection(s)**, and all the requested informations.
- ✓ Put the sample + form + payment in the envelope and send it back to us.
